SAFE-T-SWITCH®

SS4

**For Plastic, Slant-side
or Lipped-Edge
Drain Pans**

**FITS MOST PLASTIC &
METAL DRAIN PANS**

**ADJUSTABLE
MOUNTING BRACKET
– Fits slanted sides and
curved edges**

**Designed for easy
installation**

Locks in place

**Reliable, long-lasting
Magnetic Reed Switch**

**Code Compliant
– Tested to UL-508**

The most reliable condensate overflow control switch on the market now comes with a specially designed, adjustable mounting bracket that clips firmly over the edge of most plastic and metal drain pans. Safe-T-Switch® SS4 can be used for all applications or specifically where other condensate control switches cannot fit over the edge of the drain pan.

The SS4 clip fits a wide variety of primary and auxiliary pan designs and the Magnetic Reed switch allows it to be installed off-center and still perform correctly. The switch will not stick or rust and can be connected to either the red or yellow (thermostat) wire.

**Reliable, long-lasting
Magnetic Reed Switch**

**Code Compliant
– Tested to UL-508**

Safe-T-Switch[®] is the most reliable condensate overflow switch available. The new SS3-CT model contains the same patented, high-quality Magnetic Reed Switch as other Safe-T-Switch[®] models, so it will not stick or rust.

SS3-CT is a uniquely designed, normally-open switch that can be connected to the accessory wires of a communicating thermostat. The specially designed steel mounting bracket clips firmly over the edge of most pans and the slim-profile SS3-CT can be installed on primary or auxiliary drain pans. The Magnetic Reed Switch allows the switch to be installed off-center and still perform correctly.
