

# A/C FLOOD CONTROL KIT

**PROBLEM:** Water damage to walls, flooring and ceilings and mold growth caused by air conditioner condensate drain clogs and leaks

**SOLUTION:** The Safe-T-Probe® Flood Control Kit

## SAFE-T-PROBE®

**MODEL SP1P**  
Plenum Rated Electronic  
Condensate Overflow Switch

Model SP1P detects rising water in A/C condensate drains and stops the system to help prevent overflows and water damage. Can be installed inline in primary drains or plugged on secondary drain outlets. Reliable, all electronic design eliminates the need for floats or other moving parts.

Model SP1A remote sensor installs in safety pans or on floor moldings for extra safe flood control.

**\*\*NOTE –** The Model SP1A product is not a stand alone sensor and must be installed with the Safe-T-Probe® Model SP1P Sensor/Switch

**MODEL SP1A\*\***  
Remote Sensor

## SAFE-T-GARD®

**MODEL SG1**  
Condensate Overflow Alarm

Safe-T-Gard® alerts you when the drain is clogged-  
**BEFORE THE HOUSE GETS HOT.**

## NU LINE®

**MODELS NL1 & NL2**  
A/C Condensate Drain Cleaner

Nu Line helps prevent A/C drain clogs and water leaks by removing the slime build-up in the drain line and helps keep it open. Use it every three months to help prevent water damage and mold growth from clogged A/C drain lines.
